

The XR | Virtual Worlds Standards Register

Find the Standards Behind Virtual Worlds.

A curated register of standards, working groups and standards organisations relevant to XR, Metaverse and Virtual Worlds

Built and maintained by the
VIRTUAL DIMENSION CENTER

Why it matters:

- Standards are crucial for interoperability and marketability
- Standards are distributed across many domains.
- Relevant work is difficult to discover and compare.

What the Register contains: 2,500+ classified records

- 163 standards organization (SDOs)
- 416 standardization working groups
- 752 Official Standards
- 275 Industry Standards
- 310 Specifications
- 314 Recommendations / Guidelines
- 156 Technical Reports
- 112 other document types

Classification:

- 5 original dimensions:
 - Technology
 - Application field
 - Industries / verticals
 - Society / policy
 - Methodology
- parallel: NATO scheme [D6]
- parallel: European Observatory for ICT Standardization Scheme [D7-D8]

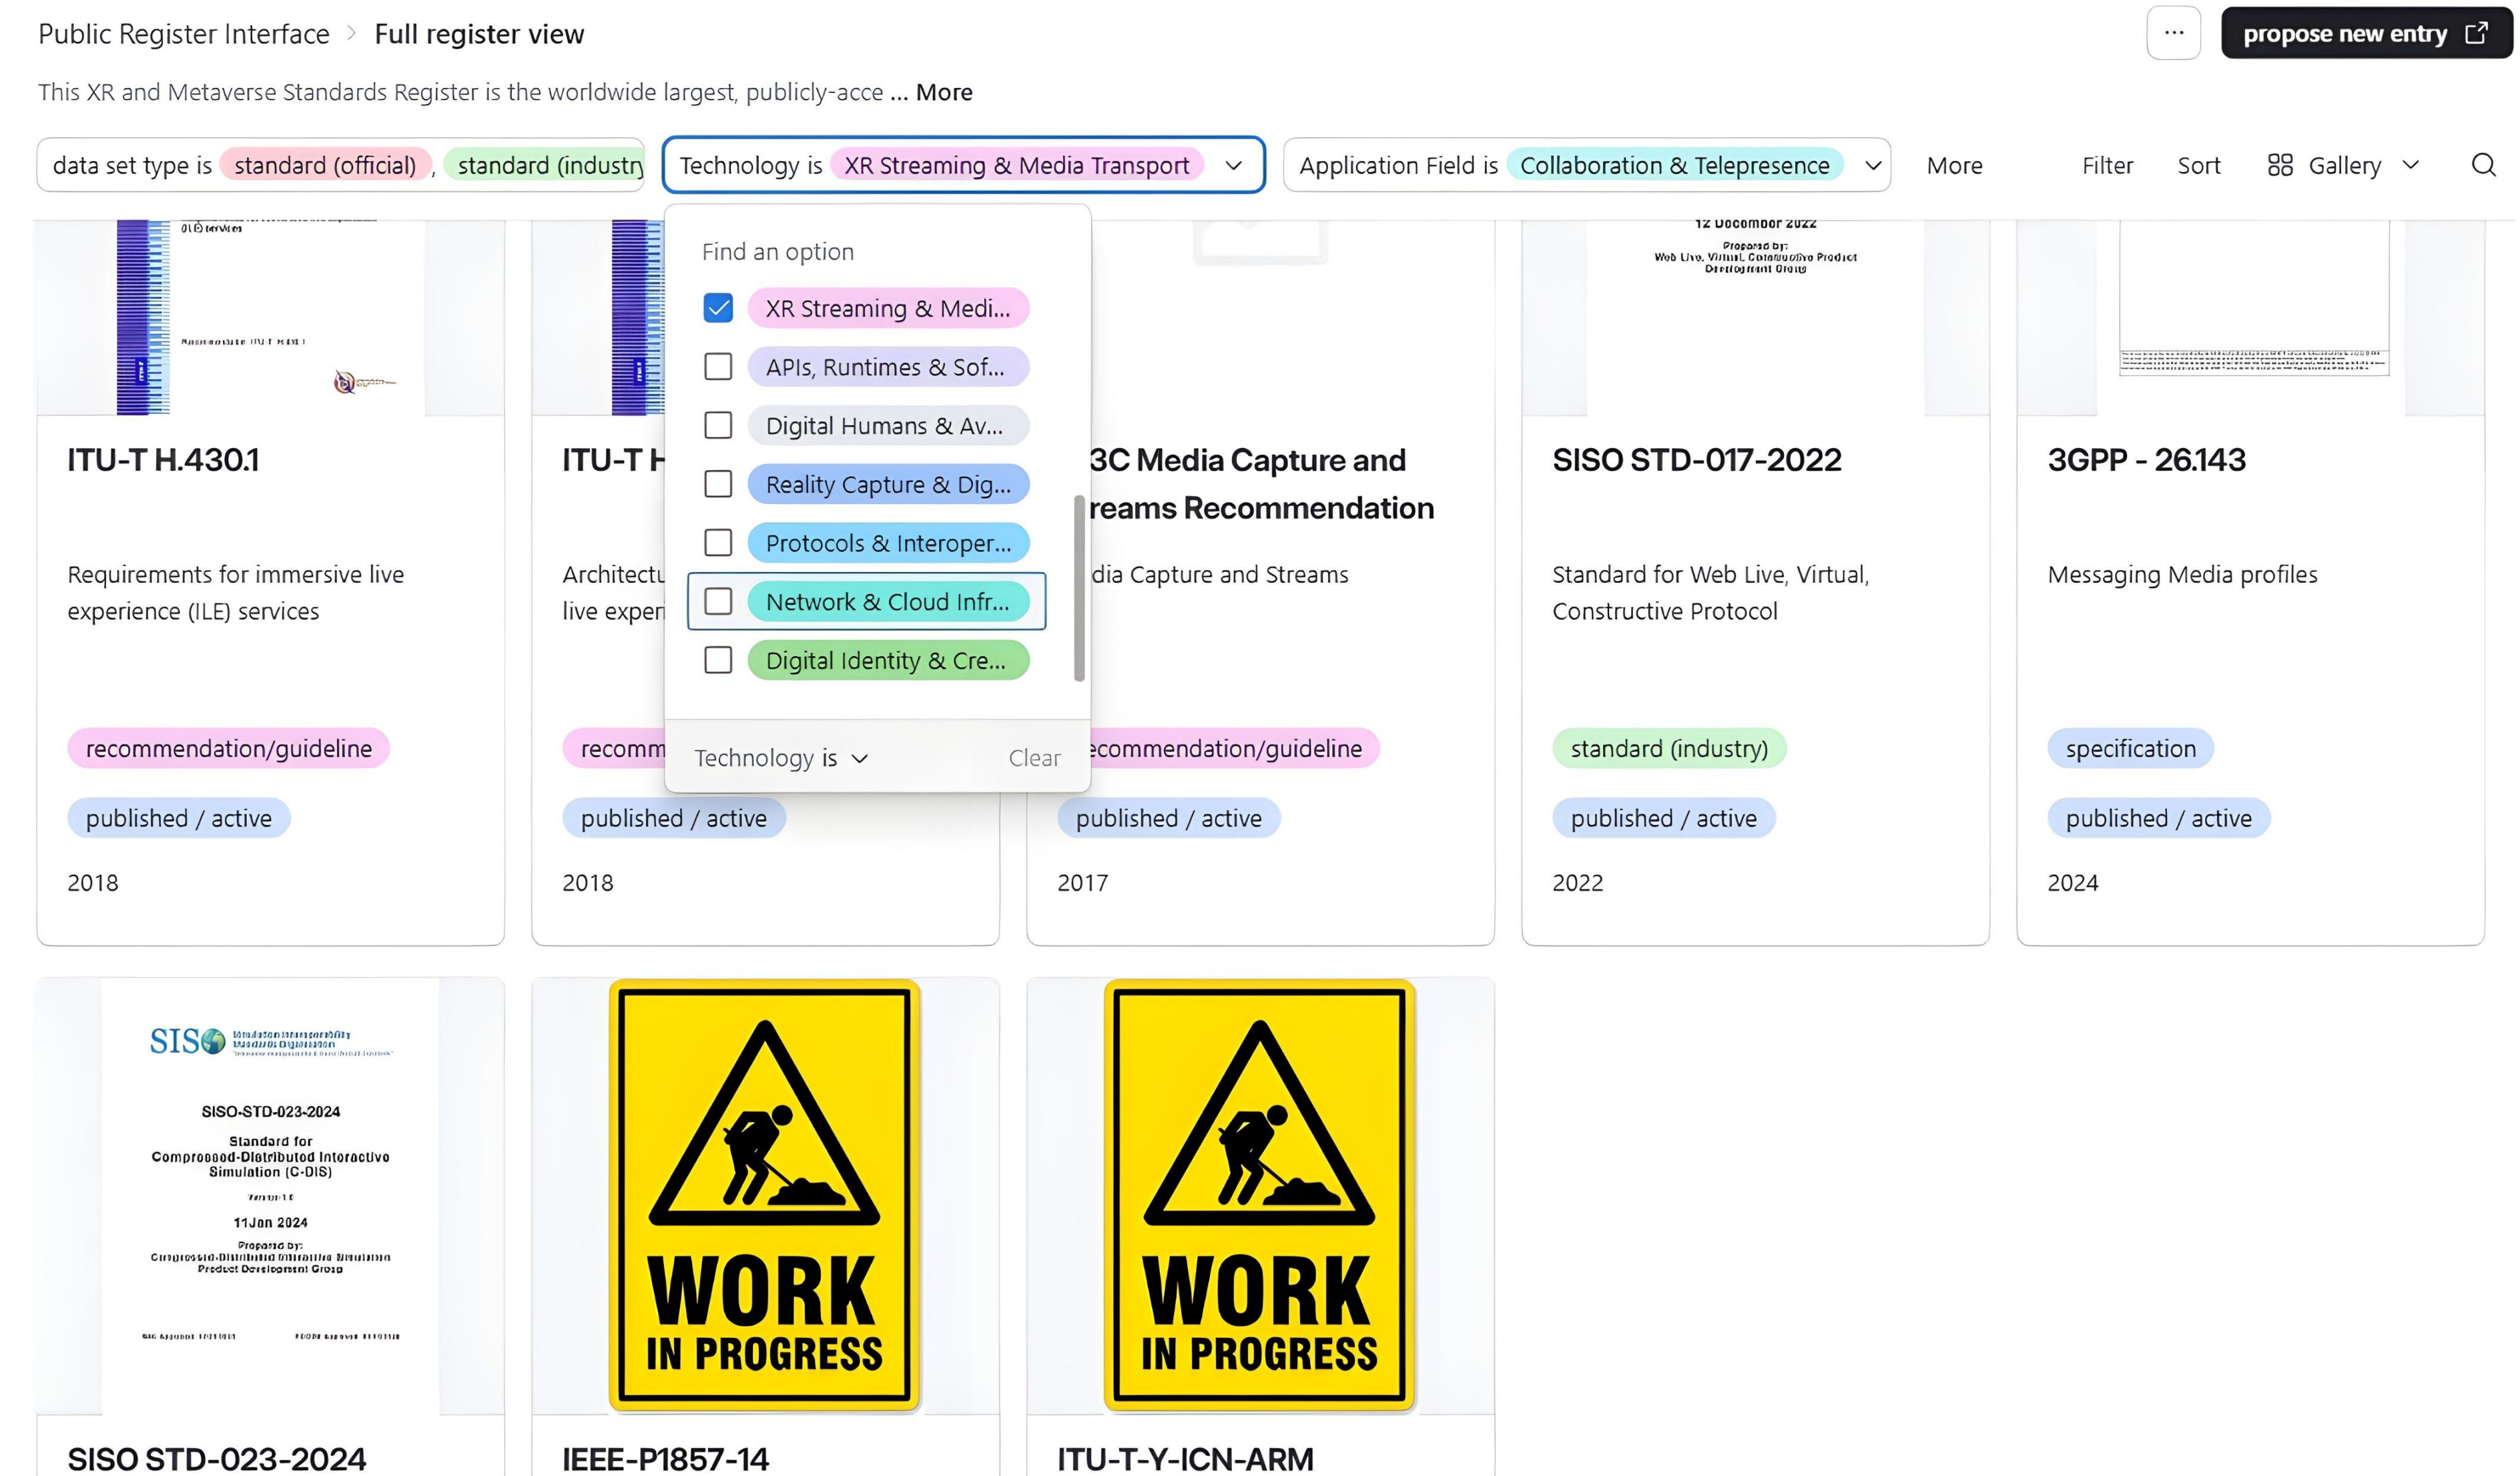

Use it:

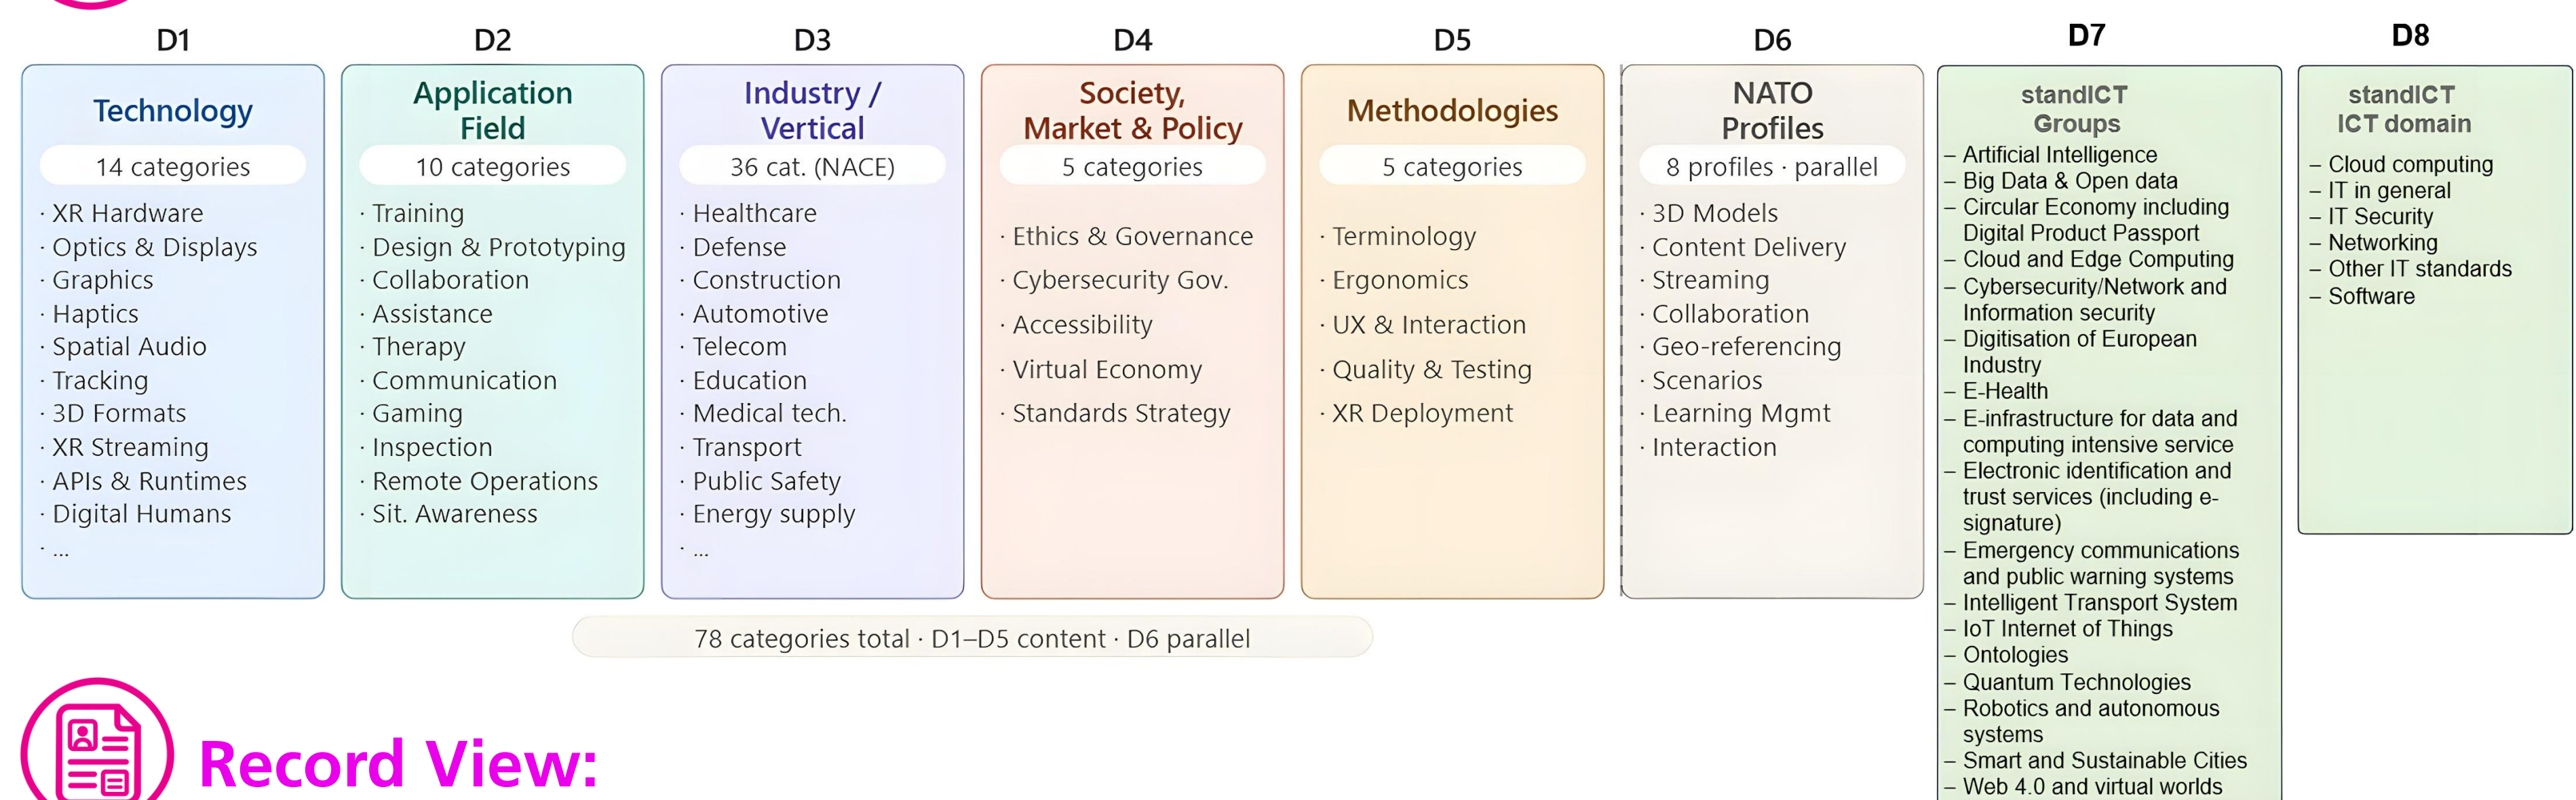

- Scan QR code
- Search relevant standards
- Identify organizations and working groups
- Example queries:
 - show published standards for avatars
 - show working groups on displays
 - show publications of ASTM
 - show documents, orgs and WGs on "ethics"
 - show current standardization projects of China (MIIT)
